

Provisional Agenda
Ninth Operating Model and Management Procedure Technical Meeting
Seattle, USA, 18 to 22 June 2018

Terms of Reference

Evaluate results of initial MP testing and refine testing protocols.

Draft Provisional Agenda

- 1. Discuss input from the Strategy and Fisheries Management Working Group meeting in March 2018**
- 2. Operating model and data inputs**
 - 2.1 Issues encountered during coding and preparation of OM scenarios.
 - 2.2 Gene tagging.
 - 2.3 Close-kin: POPs and half-sibling indices.
 - 2.4 Variability of age 4 CPUE around indices predicted by conditioning model.
- 3. Evaluate results from MP testing**
 - 3.1 Review results of initial MP trials.
 - 3.2 Reconsideration of tuning options and operational constraints.
SFMWG agreed on an initial range of tuning levels (0.25, 0.3, 0.35 and 0.4 for median SSB/SSBo in 2035) and operational constraints (2000t, 3000t and 4000t). The meeting needs to consider which combinations are feasible and provide adequate performance.
 - 3.3 Comparison of performance of tuned MPs.
 - 3.4 Consider possible MP adjustments to improve performance.
- 4. Reconsideration of robustness trials**
 - 4.1 Reconsider robustness trials for final testing prior to ESC.
- 5. Performance statistics**
 - 5.1 Performance statistics, tables and graphics.
- 6. Workplan and timetable**
 - 6.1 Update code of OM and associated graphics files.
 - 6.2 Intersessional workplan.
 - 6.3 Identify issues to be discussed at ESC.
 - 6.4 Other?
