

Comparison of CCSBT with ICCAT
on the Catch Document Scheme (CDS) for Farming
(Submitted by JAPAN)

1. Comparison of the Current Schemes (*refer to the attached diagram and forms*)
[ICCAT]

A series of relevant and validated information of each step from catch to export is recoded in one Bluefin Tuna Catch Document (BCD). Recording in BCD starts when a fishing vessel catches Bluefin Tuna for stocking purpose, and the catch information is validated by government authority before moving to stocking step. At stocking step, if necessary at transfer step as well, the relevant information is recorded to the BCD in addition to the catch information and validated accordingly. Same procedure is taken at the step of export. As a result, when BCD is verified by importing country, a series of validated information (i.e. catch, farming (stocking) and harvesting information) is available and its consistency or correctness can be checked.

[CCSBT]

Farm Stocking Form (FS) and Farm Transfer Form (FTF) are separately created from Catch Monitoring Form (CMF). Also, both FS and FTF are submitted directly and solely to the Secretariat. Therefore, a series of relevant information for each step before transshipment from farms is not recorded in CMF document, and thus it is not possible for importing countries to check such information.

2. Potential Deficiencies of the Current CCSBT CDS

- Each operation of catch, towing and stocking is not validated.
 - * Only one piece of FS is made per fishing vessel thorough a whole fishing season.
 - * Only total number and weight of mortalities are recorded for all tows of Southern Bluefin Tuna (SBT) caught by a vessel through a whole fishing season (i.e. number and weight of mortality for each tow is not recorded.).

- Since only CMF is available for importing countries, they cannot check relevant validated data of farmed SBT such as tag information, a number of SBT in each cage and farm,.

3. Suggestion for the next Session

- In order to remedy the above potential deficiencies and to establish a robust management scheme that is equally effective to the scheme of ICCAT, Japan will consider submitting a draft proposal on a revised resolution of CCSBT CDS for the next annual Session

- The draft proposal will mainly consist of the following points.

- i) Validations are conducted with respect to each operation from SBT catch by vessels to stocking to cages.
- ii) FS and FTF are integrated into CMF.
- iii) A copy of the relevant Catch Tagging Form is required as the attachment of CMF.
